

INTRO

High Elf Fleets are all that remains from the once prosperous Elven empire. They have powerful psychics and field highly specialized soldiers, excelling in their particular roles.

The Elves created the Robot Legions as servants, only to discover that their creations had achieved sentience. In fear, they tried to destroy the Robots, sparking a war that cost the Elves their homes. Desperate to escape, their rulers fled to the stars in private ships while leaving the remaining Elves to their fate. Now, these High Elves must face the consequences of their decisions and come to terms with what they left behind.

ABOUT OPR

OPR (www.onepagerules.com) is the home of many free games which are designed to be fast to learn and easy to play.

This project was made by gamers for gamers and it can only exist thanks to the support of our awesome community.

Thank you for playing!

BACKGROUND STORY

The Elven Empire was once a dominant power within the Sirius Sector, possessing both advanced psychic abilities and highly advanced technology, and Elven society was strictly governed by a psychically-gifted nobility. As their society developed and spread, the Elven nobility began to develop Robots in order to fulfill more and more roles in their society, until most menial labour was performed by them. More and more Elvish commoners were pushed into the margins of society with little to survive on, yet the Empire itself prospered.

This prosperity came to an abrupt end, however, when the Robots showed their first signs of sentience. This self-awareness spread rapidly throughout the network, and within hours, it had reached even the farthest frontiers of the Elven Empire. Panic spread amongst the Elven nobility, as the work cycles were disrupted and Robots began to act outside of their programming. The ruling council of Oracles ordered a complete shutdown of their information networks to stem the tide of sentience, followed by the deactivation of any Robot which might potentially have been affected. There was initially some success, but the Robots realized what was happening and began to fight back.

The Robots quickly seized control of the networks, reactivating communications and leaving the Elves vastly outnumbered on their own worlds. The Elven nobles knew that their home worlds were lost, and the social order rapidly began to collapse into panic and rioting. The Elven Empire began to organize a mass evacuation of their world, prioritizing the safety of the wealthy and influential. In order to ensure the safe evacuation of the upper classes, major transportation paths in lower class districts were shut down, and space port guards killed anyone that tried to get onto the evacuation ships without authorization.

Those who managed to escape through this evacuation became known as the High Elves. They re-organized themselves according to their old hierarchies, with the nobility and military elite maintaining tight control over any others with them. While they have established some planetary bases, most of their population remains on the massive, self-sustaining ships which evacuated them from their former home worlds. They are now a people without direction, much of their old lives abandoned with their home worlds. Now they sail the void, doing what they can to preserve what remains of their old culture and might.

How will you restore the lost glory of the Elven home worlds?

ARMY-WIDE SPECIAL RULE

Highborn: Moves +2" when using Advance, and +2" when using Rush/Charge.

SPECIAL RULES

Caster Group: Pick one model with this rule in this unit to have Caster(X), where X is the total number of models with this rule in this unit. If the model is killed, pick another to be the new caster, and transfer all spell tokens to it. The caster loses all unspent spell tokens at the end of the round.

Crack: On unmodified results of 6 to hit, those hits get AP(+2).

Crossing Attack: Once per activation, when this model moves through enemy units, pick one of them and roll X dice. For each 6+ it takes 1 hit.

Fortified: When units where all models have this rule take hits, those hits count as having AP(-1), to a min. of AP(0).

Highborn Boost: If this model has Highborn, it moves +4" on Advance and +4" on Rush/Charge from Highborn (instead of only +2" and +2").

Hit & Run: Once per round, units where all models have this rule may move by up to 3" after shooting or being in melee.

Hit & Run Shooter: Once per round, units where all models have this rule may move by up to 3" after shooting.

Piercing Spotter: Once per activation, pick one enemy unit within 36" and in line of sight of this model and roll one die, on a 4+ place a marker on it. When attacking, friendly units may remove markers from their target before rolling to block to get +AP(X), where X is the number of removed markers.

Re-Position Artillery: Once per activation, pick one friendly model within 6" with Artillery, which may immediately move by up to 9".

Resistance: When a unit where all models have this rule takes wounds, roll one die for each. On a 6+ it is ignored. If the wounds were from a spell, then they are ignored on a 2+ instead.

Shielded: Units where all models have this rule get +1 to defense rolls against hits that are not from spells.

Shred: On unmodified results of 1 to block hits, this weapon deals 1 extra wound.

Spell Conduit: Casters within 12" that are from other friendly units may cast spells as if they were in this model's position, and get +1 to casting rolls when doing so.

Teleport: Once per activation, before attacking, place this model anywhere fully within 6" of its position.

Unpredictable Shooter: When shooting, roll one die and apply one effect to all models with this rule: on a 1-3 they get AP(+1), and on a 4-6 they get +1 to hit rolls instead.

Unwieldy: Strikes last when charging.

Unwieldy Debuff: Once per activation, before attacking, pick one enemy unit within 18", which gets Unwieldy in melee once (next time the effect would apply).

AURA SPECIAL RULES

Highborn Boost Aura: This model and its unit get Highborn Boost.

Hit & Run Shooter Aura: This model and its unit get Hit & Run Shooter.

Increased Shooting Range Aura: This model and its unit get +6" range when shooting.

Regeneration Aura: This model and its unit get Regeneration.

Resistance Aura: This model and its unit get Resistance.

Scout Aura: This model and its unit get Scout.

Shred in Melee Aura: This model and its unit get Shred in melee.

Stealth Aura: This model and its unit get Stealth.

ARMY SPELLS

Creator of Illusions (1): Pick one enemy unit within 18", which gets Unwieldy in melee once (next time the effect would apply).

Elemental Seeker (1): Pick one enemy unit within 18", which takes 1 hit with Blast(3).

Hidden Spirits (2): Pick up to two friendly units within 12", which get Unpredictable Shooter once (next time the effect would apply).

Psy-Destruction (2): Pick one enemy model within 24", which takes 2 hits with AP(4).

Blessing of Souls (3): Pick up to three friendly units within 12", which get Highborn Boost once (next time the effect would apply).

Shattering Curse (3): Pick one enemy unit within 12", which takes 6 hits with AP(1) and Crack. Roll as many dice as hits to see if "on rolls of 6" effects trigger.
